

PID Tune - PID Tuning Demonstrator
Ver. 2.03

The program PIDTune is used to demonstrate PID controller tuning. The user can set up the simulated process, and can inject a disturbance and/or noise into the system. The program requires a PC with Windows 10 (32- or 64-bit) installed. PIDTune is a 32-bit application.

To install the program on your computer, simply copy the following files to the desired folder of your computer:

PIDTune.exe

PIDTune.chm
